The Build Out Line in Under 10 Play

(Extracted text from the August 2017 USSF Player Development Initiatives)

USSF has mandated use of the Build Out Line in the Under 10 age group beginning in the Fall 2017 season. There are a number of rules and procedures resulting from use of Build Out Lines that will affect play in U10s. USSF has a Power Point presentation of their Player Development Initiatives that includes the following information on the Build Out Line and it's implementation. Here is the latest from the August 2017 USSF PDI document...

7v7 Standards - Build Out Line

- The build out line promotes playing the ball out of the back in a less pressured setting.
- When the goalkeeper has the ball in his or her hands during play from the opponent, the opposing team must move behind the build out line until the ball is put into play.
- Once the opposing team is behind the build out line, the goalkeeper can pass, throw or roll the ball into play (punts and drop kicks are not allowed).
- After the ball is put into play by the goalkeeper, the opposing team can cross the build out line and play resumes as normal.
- The opposing team must also move behind the build out line during a goal kick until the ball is put into play.
- If a goalkeeper punts or drop kicks the ball, an indirect free kick should be awarded to the opposing team from the spot of the offense.
- If the punt or drop kick occurs within the goal area, the indirect free kick should be taken on the goal area line parallel to the goal line at the nearest point to where the infringement occurred.
- The build out line will also be used to denote where offside offenses can be called.
- Players cannot be penalized for an offside offense between the halfway line and the build out line.
- Players can be penalized for an offside offense between the build out line and goal line.

Build out lines should be equidistant between the penalty area line and halfway line

Build Out Line Practical Applications

- Ideally, the goalkeeper will wait to put the ball into play once all opponents are past the build out line.
- However, the goalkeeper can put the ball into play sooner but he or she does so accepting the positioning of the opponents and the consequences of how play resumes.
- To support the intent of the development rule, coaches and referees should be mindful of any intentional delays being caused by opponents not retreating in a timely manner or encroaching over the build out line prior to the ball being put into play.
- Coaches are responsible for addressing these types of issues with their players.
- Referees can manage the situation with misconduct if deemed appropriate.
- Referees should be flexible when enforcing the 6 second rule and counting the time of possession should only begin when all opponents have moved behind the build out line.
